# AICR Product Comparison

	Custom Research FLAGSHIP · NRR	Synthetic Reports FAST INSIGHTS · NRR	Case Studies PROOF CONTENT · NRR	Growth Subscription Bundle SUBSCRIPTION · ARR · RECOMMENDED
WHAT IT IS	Bespoke study that answers a specific business question the client brings, delivered as a full written report with original data and commentary collected via AI voice agent.	A structured research report built from data G2 already holds, customized to a client's focus area.	Third-party validated customer success stories written by G2 and grounded in direct interviews with a vendor's customers.	Subscription-based bundle with custom research assets, hosted G2 content, and a recurring refresh cadence.
SCOPING	Each project is scoped from scratch: methodology, audience, and output are designed uniquely per client. No two engagements are the same.	Uses a templated framework that can be adapted to specific angles and topics. Sold as a standalone, per-project deliverable, no ongoing commitment.	Each case study covers one customer story. Can be sold individually or bundled with other AICR products. Scope is defined by number of stories and depth of interview.	Scoped as an annual subscription with defined research deliverables, content hosting on G2 properties, and a recurring refresh schedule. Renewed annually.
DATA SOURCING	G2 researchers recruit respondents specifically for the engagement from G2's verified reviewer network and the client's own customer list or 3rd party recruiting partners.	Existing G2 platform data is pulled: historical review signals, behavioral usage patterns, and category-level benchmarks accumulated across the G2 marketplace.	G2 researchers conduct structured conversations with the client's customers. Content is drawn from those firsthand accounts, then written and validated by G2.	Combines purpose-built custom research with G2's existing hosted content. Published on G2-owned properties and refreshed on a recurring cadence.

ADD-ON: DEMAND

## G2 Buyer Intent

Accelerate and optimize your pipeline with bottom of funnel intent signals only available from G2.

These unique signals complement existing account based marketing, demand generation and pipeline conversion efforts with direct insight into compelling buyer signals across the G2 platform.

- Target accounts most likely to convert with G2 Buyer Intent
- Increase MQLs and reduce the cost of acquisition
- Accelerate sales cycles and increase win rates
- Combat churn and identify upsell opportunities with intel from buyers engaging with your competitors and category
- Gain 30 user seats per vendor for the management of Buyer Intent

ADD-ON: ADS

## G2 Ad Clicks

If cost containment is desired as customers test their ad presence on G2, G2 Clicks offers a Pay-Per-Click approach to ads on G2. With flexible pricing, customers have the ability to cancel at any time and see how ads perform across the platform. Volume is not guaranteed with G2 Clicks - as that can be limited and blocked by customers on G2 Paid Promotions.

- Set custom monthly budgets for PPC ads
- Test ads and control costs
- Put ad performance budgets to use on the marketplace trusted by over 100M software buyers

ADD-ON: ADS

## G2 Ads Paid Promotion

Paid Promotions allow customers a complete buyout of desired ad space. These buyouts can be done on a quarterly or annual basis and are limited to three spots per placement. With a guaranteed volume and preferential placement over G2 Clicks, G2 Paid Promotions allow customers to deploy custom ad designs to targeted personas.

- Dominate competitive categories with a paid ad presence
- Capture a guaranteed ad impression share
- Offer multiple custom CTAs
- Take advantage of all inclusive free clicks

ADD-ON: DATA

## G2 Data Solutions

When investors, venture capital, and private equity firms are looking for a source of truth on software products, G2 Data Solutions offers the industry's most accurate product data. Find your next software opportunity using profile traffic, comparisons and customer satisfaction scores from G2's 100M+ buyers, more than 3 million reviews and over 10 years of historical data to inform investment decisions.

- Gain a competitive advantage by tracking product momentum, emerging trends, and B2B voice of customer
- Identify purchase preference patterns when comparing products with quantitative benchmarking signals
- Analyze market share and map the market landscape with accuracy and efficiency
- Empower smart decisions with proof points on adoption, switching behaviors and deal sourcing ROI
- Arm yourself with real-time insights to forecast demand, mitigate risk and evaluate profit-making strategies
